EDUCATION

Indian Institute of Information Technology, Sri City (IIIT Sri City)
Bachelor of Technology in Computer Science (CSE)

November 2022 - December 2026
GPA: 8.01

SKILLS

Languages : Python, C, C++, Java, JavaScript

Frameworks: Django, Flask, FastAPI, React, Node.js, Express.js, Php

Databases : PostgreSQL, MySQL, MongoDB, Redis

Concepts : Data Structures & Algorithms, OOP, Microservices, Distributed Systems

Tools : Git, BitBucket, Docker, Celery, RabbitMQ, Pytest, LangChain, VS Code, Agile Practices, Linux

WORK EXPERIENCE

Bizom, Bangalore

February 2026 – Present

Software Engineer Trainee

- Developed and optimized 8+ backend modules in PHP, MySQL, and CakePHP, improving query execution, reducing API response time, and enhancing large-scale business workflow efficiency.
- Delivered reporting, receipt generation, and monitoring features across 3 production services; resolved 15+ critical production issues and rewrote complex SQL queries, reducing average query execution time by 40

AI4Bharat, IIT Madras 🇮🇳

June 2025 – September 2025

Software Developer Intern (Remote)

- Refactored React components and improved backend integrations, optimizing user time calculations, translation workflows, and model inference pipelines, resulting in a 20% improvement in overall system efficiency.
- Enhanced Chitralekha platform stability by enabling SRT downloads, validating task payloads, resolving bugs in voiceover and translation modules, and optimizing VO/VOTR processing workflows and cutting average data-fetch latency by 40

Bosch India, Maharashtra 🇮🇳

May 2024 – August 2024

Web Development Intern

- Built a full-stack Intern Management System using Django with secure authentication, automated notifications, analytics dashboards, role-based access control, and centralized intern activity management features.
- Improved reporting workflows through Excel-based exports, and visualization modules, enabling faster data processing, better reporting accuracy, and reducing report generation time by 25%.

PROJECTS

QuikLearn 🌐 🌐

React, Node.js, Express.js, MongoDB

- Designed a scalable MERN-based e-learning platform with secure authentication, role-based access control, interactive course management, and real-time collaboration capabilities for seamless learning experiences.
- Streamlined backend APIs, caching strategies, and database queries, reducing average response time by 25%, lowering p99 latency by 62.5%, and improving overall session efficiency by 47%.

Generate-Awesome 🌐 🌐

Python, Flask, React, TypeScript, LangChain

- Engineered an AI-powered project generator using a 3-agent LangChain workflow that converts natural language prompts into complete, runnable web projects in under 60 seconds.
- Created a modern React frontend with live code editing, Monaco editor integration, real-time status tracking, and a Flask backend with asynchronous generation and file management APIs.

PUBLICATIONS

Performance Analysis of Weighted Victim Cache Replacement Policy : 🇮🇳

ICCCNT 2025

16th International Conference on Computing, Communication and Networking Technologies (Paper ID: 8957)

- Proposed and implemented **WVCRP** in **ChampSim** (C++) to improve LLC performance.
- Designed a compact 1-byte metadata structure, achieving efficiency gains over LRU.
